

DIDI NURAHMAN

F U L S T A C K E N G I N E E R

PROFESSIONAL SUMMARY

System Analyst and Fullstack Developer with 2+ years of experience managing end-to-end system development — from business requirement analysis and process mapping to Functional Specification Document (FSD) preparation and user acceptance testing. Skilled in ERP system management (ERPNext) and building high-performance web applications using PHP, JavaScript, React, and Laravel, with MySQL database optimization and Android/iOS mobile app maintenance. Passionate about precise system analysis and delivering scalable solutions that align with real business needs.

WORK EXPERIENCE

Full Stack Developer - PT. Textilindo Oct 2025 – Present

- Analyzed business requirements and implemented integration between the internal ERP system and Indonesia Customs CEISA 4.0, automating Import Declaration (PIB) processes and reducing document preparation time by up to 89%.
- Built an internal recruitment portal integrated with ERPNext, enabling candidates to submit applications directly into the system and replacing the manual process with AI-powered instant assessment, reducing evaluation time by approximately 80%.

Programmer - PT Merry Riana Group Feb 2024 – Feb 2026

- Managed a sales website (Laravel, CodeIgniter, React.js) including payment gateway integration and a real-time transaction dashboard.
- Developed an event ticketing system covering ticket sales, participant registration, and barcode scanning, complete with an analytics dashboard.
- Maintained Android and iOS applications built with Ionic, collaborating cross-functionally from planning through deployment.

Key Projects ERP-CEISA 4.0 Integration

- Automated the creation of Import Declaration Documents (PIB) by integrating enterprise ERP systems with the CEISA 4.0 customs portal, eliminating repetitive manual data entry processes.
- Reduced import document preparation time from approximately 45 minutes to 5-10 minutes per document, accelerating customs processing by up to 89%.
- Eliminated repetitive manual data entry across the import documentation workflow.
